

**RESOLUTION 01.2020-39 (A-20)**  
**SUPPLEMENTAL RESOURCES FOR INFLIGHT MEDICAL KIT**

**ISMS Board Action Taken on 01/25/2020**

**Adopted Resolution 01.2020-39 (A-20), as submitted.**

**Council on Medical Service Recommendation to ISMS Board on 01/25/2020**

The Council heard from the author about her recent personal experiences being called on to render care during an inflight medical emergency; the plane's emergency kit was inadequate to judge vital signs, making it difficult to assess common in-flight emergencies. Council members had similar experiences to the author of the resolution, and agreed that these kits, which were last approved by the FDA in 2001, need to be updated with better equipment.

The Council on Medical Service recommends that the ISMS Board of Trustees adopt Resolution 01.2020-39 (A-20).
